From the Education Committee

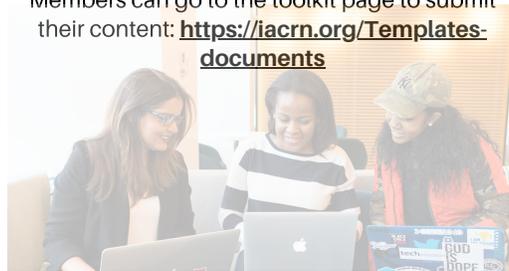

We are looking for materials to add to our member toolkit. Items include, but are not limited to:

Online resources: websites you use frequently

Templates and documents:

- Orientation materials
- PK sheets
- Helpful hints to prepare for an audit or an audit Worksheet
- Job descriptions
- Templates
- Checklists
- How you incorporated the IACRN Scope and Standards into your institution

Members can go to the toolkit page to submit their content: <https://iacrn.org/Templates-documents>

Oncology Certified Nurse (OCN®) 2020 Role Delineation Study Survey

Welcome to the 2020 OCN® Role Delineation Study Survey! The purpose of this survey is to identify tasks and knowledge reflective of oncology nurses. The results of this survey will be used to help develop the specifications for the Oncology Certified Nurse (OCN) certification exam.

You do not need to hold the OCN credential to participate; if you work as an oncology nurse, we want your opinion!

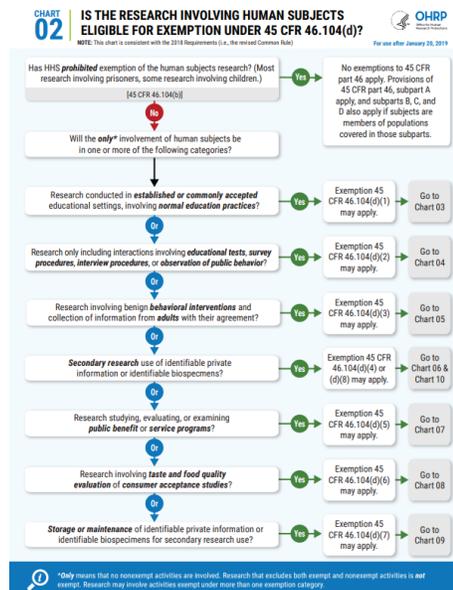

The survey will likely require 30 to 45 minutes to complete. However, you can complete the survey in separate sittings at the same computer or device. Just be sure to completely finish a page and click "Next" to save your progress up to that point. There is no limit on the number of times you can use the link to return to the survey before completion. While you can complete the survey on a smart phone, the format of some questions may require side-to-side scrolling, and therefore we recommend using a computer or tablet to provide your responses.

To show our appreciation for your participation in this survey, upon completion you will be given the opportunity to enter a drawing for one of three \$150 gift cards.

Please click here to began the survey

REGULATORY CORNER

OHRP has posted on its website a set of decision charts that are consistent with the 2018 Requirements (i.e. the revised Common Rule). Titled, "Human Subject Regulations Decision Charts: 2018 Requirements," these graphic charts are intended to aid those who need to decide if an activity is research involving human subjects that must be reviewed by an institutional review board (IRB) and whether informed consent or the documentation of informed consent can be waived under the 2018 Requirements found for the U.S. Department of Health and Human Services (HHS) at 45 CFR part 46, Subpart A. The 2018 Requirements were originally published on January 19, 2017 and further amended on January 22, 2018 and June 19, 2018.

The decision charts are necessarily generalizations and may not be specific enough for particular situations. The charts do not address requirements that may be imposed by other organizations, such as the Food and Drug Administration, the National Institutes of Health, other sponsors, or state or local governments.

These decision charts can be accessed at:

<https://www.hhs.gov/ohrp/regulations-and-policy/decision-charts-2018/index.html>
