#### ABOUT THE JOB:

The Clinical Research Manager plans and directs the implementation of clinical research in compliance with federal, state, and institutional regulations, primarily providing clinical research nurse (CRN) management in collaboration with Research Administration leaders. Supervises department CRNs; serves as a resource to external CRNs. Ensures high quality research, customer service excellence, and fiscal responsibility while serving as a direct link between the CRNs, clinical research staff, Principal Investigators, and research/institutional/clinical leadership. Accountable for the performance and results of clinical research activity.
