**Position Title:** Clinical Research Nurse  
**Organization Name:** Kovler Diabetes Center, University of Chicago Department of Medicine, Section of Endocrinology, Diabetes & Metabolism  
**Organization Location:** Chicago, IL

**Position Description:**  
Working within the Kovler Diabetes Center in the Department of Medicine at the University of Chicago, the Clinical Research Nurse facilitates diabetes clinical research studies.

The ideal candidate should have a strong background in clinical research. Specific experience in studies pertaining to endocrinology and diabetes is preferred, but not required. Candidates should be able to:

1. Conduct clinical study visits in accordance with protocol and participate in the conduct of clinical research projects/studies involving various modalities of treatment for patients within the Department of Medicine.
2. Evaluate subject laboratory and physical findings with investigator/sub-investigators
3. Help obtain additional information from subjects and healthcare providers where needed as it pertains to diagnosis and treatment.
4. Serve as a liaison and aid with communication between the various parties of the research team including but not limited to the P.I., sponsoring agent, regulatory groups, patient, family members, referring MD's/community MD's, pharmacist, and statistician.

**Type of Position:** Full-Time, Benefits Eligible

**Minimum Qualifications:**

**Education:**  
Minimum requirements include a college or university degree in related field.

**Work Experience:**  
Minimum requirements include knowledge and skills developed through 2-5 years of work experience in a related job discipline.

**How To Apply:**

Please apply directly on [The University of Chicago HR website](https://hr.uchicago.edu). As a part of the application process, you will be required to submit a record of work history, an updated resume or CV and cover letter.

Additional details surrounding specific job competencies can be found in the full job posting via the link provided above.
